

Project Management via Team Working

A one-day course examining the overall Project Management process and discusses the potential of involving the project team in the project planning process. The course encourages the Project Manager to become a Project Leader, and highlights that a committed, communicative and involved project team is required for all elements for a successful project planning process. These aspects of Project Management are then put to the test in a safe environment during the afternoon session in a Project Management Simulation.

Morning Session:

- Leadership and Team Working
 - Managers and Leaders
 - Groups and Teams
- Team Commitment
 - Identifying Commitment
- Team Involvement
 - The Project Planning tools
- Trust in the Team
 - Honest Estimates
 - Contingency
 - Accurate Progress reports
- Team Communication
 - Communication Planning
 - Formal and Informal Communication

Afternoon Session:

A 2-hour Project Management Simulation, based on Scheduling and Cost Control in a Construction Engineering Project.

Results, Feedback and Lessons Learnt.
