

## Master's Project Titles

**Disclaimer:** These titles are the original thoughts of students and may not be the final agreed and submitted title. They may be too broad, too specific, or biased in some way! They could be too short, too long, or lack a Master's level verb.

1	A comparative analysis of project lifecycle management in automotive and construction industry
2	A Comparison of Project Risk Management between Automotive and Rail Transport Industries
3	A critical analysis of the participative leadership style and its impact on project outcomes (a case study of Bulsar engineering and Wooley gmc)
4	A critical evaluation of Oil and Gas projects in Iraq under the Technical Service Contract with International Oil Companies and the Contract of National Oil Companies.
5	A critical investigation into stakeholder engagement in Nigerian Government projects. A comparison between Brass Ing project, Nigeria and Tata Steel Company Netherlands.
6	A development of the performance measurement framework for project management in Information and Communication Technology projects in engineering companies
7	A development plan for the decommission of offshore oil and gas platforms in the North Sea
8	Achieving Sustainability through Project Management: A study on the impact of adopting sustainable project management methodologies within project organisations
9	An analysis into how teams react to project risks in the construction industry
10	An Analysis of Project Schedule Management for Standard Development in Indonesia Standardization Agency (BSN)
11	An analysis of project supply chain risk management in automotive industry
12	An Appraisal of a Sustainable Public Private Partnership in Infrastructure Projects in Nigeria
13	An Assessment of Project Management Procedure in a GIS Project
14	An assessment of sustainable power projects - its effect to the socio-economic development in Nigeria

15	An Empirical Study On The Relationship Between Film Celebrities' Interactions On Sina Weibo And The Box Office
16	An Evaluation into Practical Applications of Monte Carlo Risk Analysis
17	An Evaluation into project team development in international joint venture: BMW BRILLIANCE as a case study
18	An evaluation of benefit realization plan of joint venture megaproject in oil and gas sector in Nigeria
19	An Evaluation of collaboration in European Automotive industry project: Daimler AG with the BAIC Motor
20	An Evaluation of Project Management Contents for Business Plan Templates for UK Start-up Companies.
21	An Evaluation of Project Management Methodologies for the Indonesian Construction Sector"
22	An Evaluation of project success factors in virtual project management.
23	An evaluation of the impact of procurement operations on public healthcare delivery systems in Ghana
24	An investigation into factors affecting project management performance in developing countries: a case study of Nigeria
25	An investigation into project management for international construction in china
26	An investigation into project managers professionalism
27	An investigation into project risk management of construction project in developing countries like Bangladesh
28	An Investigation into the Gender Diversity of Project Managers in China and the Impact in Project Teams
29	An Investigation into the impact of implementing TQM in Indian Manufacturing sectors
30	An Investigation into the implications of Health and Safety legislative requirements on engineering projects performance, comparing case studies from developed and underdeveloped economies.
31	An investigation into the success rate of projects in construction sector: a case study of developing country
32	An investigation into the varied methods of teaching project management which lead to a successful project manager
33	An investigation into time and cost overruns of public buildings projects in Nigeria. A case study of Borno state
34	An investigation of people issues in Chinese construction project management
35	An Investigation of Risks and Significance of Risk Management in Tesla Inc due to development in Technology

36	Analysing the impact of knowledge management in project management construction
37	Analysing the Impact of Psychological Contract Violation on Chinese Corporate Employee Turnover Rate
38	Application of PDCA cycle impacts on knowledge development and experience feedback in Construction Project – Critical evaluation in the case of McLaren Construction Group
39	Assessing the Feasibility of the Triple Bottom Line in Sustainability of Contracting in Project Management in the United Arab Emirates
40	Assessing the Impact of Cultural Differences on the Schedule of international Engineering Projects: A Case Study of India
41	Assessing the Importance of Schedule and Cost Management within the United Kingdom's Construction Industry
42	Change Management of Adopting ERP in Chinese Manufacturing SMEs
43	Cost overrun in construction project of developing countries.
44	Critically evaluate the importance of measuring project success beyond the triple constraint framework in heavy projects
45	Critically justify the Innovation and new product development process in small and medium size food enterprise in the UK.
46	Developing a framework for the critical success factors of project risk management in construction industries.
47	Diversity in Project and Program Management
48	Evaluate how lean project management principles can support Tier 1 automotive suppliers to achieve operational excellence
49	Evaluate project management in Iraqi petroleum industry: a case study in Basra oil company
50	Evaluating lean construction techniques in the construction industry in Indonesia
51	evaluating project management maturity impact on project success
52	evaluating project management maturity impact on project success
53	Evaluating the application of project management methodologies in Russian and UK businesses.
54	Evaluating the effectiveness of outsourcing key logistics activities on AV Thomas & Company Limited.
55	Evaluating the effectiveness of two project crashing techniques in project performance: A case study comparison of construction and the upstream oil and gas sector in the United Kingdom
56	Evaluating The Impact of Leadership on Students' Groups' Performance in High Educational Institutes (Case Study from Engineering Project Management MSc. Students at Coventry University)

57	Evaluating the Influence of Transformational Leadership on Project Success
58	Evaluating the Multi-project management information system of engineering construction enterprises in China
59	Evaluation into risk management of 4G mobile base station construction engineering project in China
60	Evaluation into the effect of sustainable project management on the iron triangle
61	Evaluation of conflict resolution in project stakeholders in telecommunication industry
62	Evaluation of Project Management Tools in Construction Companies in Sultanate of Oman
63	Evaluation of water supply project delivery plan by Cross River Basin Development Authority in Nigeria
64	Examine the existent issues and application of contract management in construction project in China.
65	Health and safety practices in project management in United Arabs Emirates: what are the failures
66	How can Organizational Contextual Behaviour be used as a tool to enhance the functional and the contextual performance in Pakistan's construction industry
67	Implementation of Control Techniques of TQM in Construction Industry: Comparative Analysis between developed and developing countries
68	Improving China's Soft Power Through Exporting Chinese Musicals in International Trade with Analysis of what Barriers have to be Overcome by Chinese Authority and how to Overcome.
69	Improving construction Project Management in Oil and Gas sector in Iraq
70	Investigating the effect of Critical Success Factors in the application of contract management in construction projects
71	Investigating the Effectiveness of Project Management in Complex Engineering Projects, a Case Study of Wind and Solar Energy Projects in Sub Saharan Africa (Nigeria)
72	Investigating the impact of implementing scrum project management methodology on software project.
73	Investigation into International project team development and cross-culture management
74	Investigation into the success rate of large-scale agile transformation in financial service companies

75	Investigation of Contractual Risks of China's State-owned Construction Enterprises in International Project under The International Federation of Consulting Engineers Contract Conditions
76	Investigation of the effect of risk management techniques for innovative new product development projects.
77	Lean Start-up Methodology Application: Social Enterprise Business Model Innovation-Promoting Chinese Classics via New Media Platforms in China.
78	Phase-based analysis of causes of project failures and evaluation of project triangle and early warning signals as preventive strategies.
79	Product Lifecycle Management- Strategies at different stages of the project lifecycle in Automotive Industry
80	Project communication management in real estate development project based on the case study of Nanjing Country Garden Project
81	Project Management and Sustainable Design: Assessment into EU green building regulations and strategies implemented in Cyprus Construction Industry.
82	Project Risk Management in Innovative Product Development Process
83	Project Risk Management on New-energy Vehicle especially in China
84	Propose a new Project Management Template for the Aerospace Industry.
85	Research into the Pharmaceutical Supply Chain for delivery of Quality health care
86	Research on Public Private Partnership (PPP) Arrangement Modal on implementation of Power Projects in Tanzania
87	Research on the factors and influences of schedule management in construction engineering projects
88	Research sustainability of Projects in the Arctic exploring and Development.
89	Research the formation mechanism and prevention strategy of social risk in Chinese construction projects
90	Risk Management of Overseas Investment/International Joint BOT Project
91	Selection Of Supplier By Construction Company
92	Stakeholder Management in PPP Programmes and Projects
93	Study of Project management in the Electric Vehicle Industry -- The case study of TESLA
94	Supply Chain Integration in the project-based environment: A framework for successful implementation in the UK Construction Sector

95	Sustainability in project management: How can Sustainability implemented into PRINCE2 methodology
96	The application of e-commerce in transforming Taiwanese manufacturing SMEs
97	The application of lean tools and techniques to the operations of a brewery - a case study of Accra brewery limited
98	The Comparison Between Qualitative and Quantitative Analysis in Project Risk Management Process
99	The Evaluation of Managing People In The Construction Industry In The United Arab Emirates(U.A.E).
100	The evaluation of quality management in real estate project: a case study on Lanshan project of Wanke Co.Ltd
101	The extent to which the recent UK coalition Government health care reforms affect the National Health Service and its supply chain management and purchasing processes
102	The Impact of Technology on Project Management
103	The implementation of prince2 and agile methodologies in different organizations
104	The importance of emotional intelligence in the project management in manufacturing industry
105	The influences of original equipment manufacturers (OEM) system in the Chinese manufacturing sector
106	The potential of applying project management principles to a master dissertation project
107	To evaluate the stakeholder engagement in government or public funded projects.
108	Toward the achievement of Project Management Maturity for a Small to Medium Enterprise in the Construction Industry of Trinidad and Tobago.
109	What Makes a Good Agile Project Manager
110	Why do engineering projects fail? And how implementation of project management can enhance project success.
119	
120	
121	

### Master's Project Titles

**Disclaimer:** These titles are the original thoughts of students and may not be the final agreed and submitted title. They may be too broad, too specific, or biased in some way! They could be too short, too long, or lack a Master's level verb.

1	A comparative analysis of project lifecycle management in automotive and construction industry
2	A Comparison of Project Risk Management between Automotive and Rail Transport Industries
3	A critical analysis of the participative leadership style and its impact on project outcomes (a case study of Bulsar engineering and Wooley gmc)
4	A critical evaluation of Oil and Gas projects in Iraq under the Technical Service Contract with International Oil Companies and the Contract of National Oil Companies.
5	A critical investigation into stakeholder engagement in Nigerian Government projects. A comparison between Brass lng project, Nigeria and Tata Steel Company Netherlands.
6	A development of the performance measurement framework for project management in Information and Communication Technology projects in engineering companies
7	A development plan for the decommission of offshore oil and gas platforms in the North Sea
8	Achieving Sustainability through Project Management: A study on the impact of adopting sustainable project management methodologies within project organisations
9	An analysis into how teams react to project risks in the construction industry
10	An Analysis of Project Schedule Management for Standard Development in Indonesia Standardization Agency (BSN)
